CNA Is An FFRDC

- DoN's Federally-Funded Research and Development Center
 - Characteristics
 - Non-profit
 - Can't compete with private contractors for DoD work
 - Stable, long-term relationships with sponsors
 - Privileged access to information
 - Major emphasis placed on balancing **closeness** with **objectivity**

Who's Retiring? When?

- Enlisted Marines, about 2,300 each year
 - 65% of them at about 20 years of service
 - Only 11% of them after 25th year of service (less than 100 make 30 years of service)
 - Most are E-7s and E-8s
- Marine Corps officers, about 500 each year
 - 30% at 20 years; 10% at 30+ years of service
 - Ranks are O-5, O-4, and O-6
- Chief warrant officers
 - About 150/year; most at 20 years

Date of Entry into Armed Forces (DEAF)

- Obscure, but critical, date
 - Determines which is *your* retirement plan
 - Is on Statement of Leave & Earnings
- Date first enlisted/commissioned into *any* component of the Armed Forces
 - Has no bearing on longevity for pay or years of service
 - Should never change: not adjusted for broken time or time lost
- Other services/OSD call date DIEMS

What's happening now?

- Personnel are retiring under High-1
 - DEAF date 7 Sep 1980 or earlier
- Personnel are retiring under High-3
 - DEAF date 8 Sep 1980 - 31 Jul 1986
- Personnel are hitting 15-year-of-service point and need to make irrevocable decision on CBS/REDUX or High-3
 - DEAF date 1 Aug 1986 or later
 - Aug 2006 will get first regular retirements

CSB / REDUX vice High-3

- Career Status Bonus/REDUX
 - \$30,000 at 15 years of active duty and agree to complete 20 with MC approval
 - If retire at 20 yrs, **40%** of average base pay for highest 3 years
 - Extra 3.5% *per year* for years after 20 (75% at 30)
 - COLA at CPI rate minus 1 percentage point
- High-3
 - If retire at 20 yrs, **50%** of average base pay for highest 3 years
 - Extra 2.5% *per year* for years after 20 (75% at 30)
 - Full inflation protection (COLA at CPI)

Retirements at 30 Years of Service

- Are CSB/Redux and High-3 pensions the same?
 - No
 - Less inflation protection in CSB/Redux
- How likely is a retirement at 30 years of service?
 - Not very likely
 - Less than 4% of enlisted retirements are at 30 years of service

How much is retirement income reduced in the ~~REDUX~~ option?

- Assumptions
 - Military pay grows 3.5% per year until retirement
 - CPI grows 3.5% per year
 - Service member lives to age 79
 - Enlisted are in 15% tax bracket; officers in 28% tax bracket
- New Windows Desktop application
 - User can input own data and get answers

E-7 Retiring at age 38 with 20 Years

E-8 Retiring at 42 with 24 Years

CWO-3 Retiring at 38 with 20 Years

O-6 Retiring at 50 with 26 Years

Get paid now or get paid later:

~~How do you compare?~~

- Consider this cash-out as a “loan” to be paid back by smaller, future retirement checks
 - Mortgages, car loans, credit card debt
 - Use an interest rate (APR) to describe transaction
- Peculiar repayment scheme
 - Pay nothing until retire; then pay back until death
 - Earlier figures illustrated repayment amounts

What is the APR for this “loan”?

- Retiring at 20 years of service, age 40
 - 11.7% for E-6s
 - 12.9% for E-7s
 - 13.7% for E-8s
 - 14.8% for E-9s
 - 15.0% for CWO-3s
 - 17.3% for O-4s (retirement age 42)
- Updated original 2001 paper for 2004 decisions

Repayment Amounts for the ~~\$30K~~

- Retiring at 20 years of service, age 40
 - \$233,379 for E-6s
 - \$272,229 E-7s
 - \$303,804 for E-8s
 - \$347,475 for E-9s
 - \$353,918 for CWO-3s
 - \$353,198 for O-4s (retirement age 42)
 - \$391,391 for O-5s (retirement age 42)
- If live to 85 years, add another \$100,000

How do the terms compare with a 30-year mortgage?

- \$30,000 continuation bonus has
 - Higher interest rate or APR
 - Much larger repayment amounts
- Example of E-7 retiring at age 40 with 20 years of service
 - \$30,000 bonus has APR of 12.9% and \$272,229 repayment amount
 - \$30,000 30-year mortgage has APR of 6.0% and repayment amount of \$65,000

Why reject more generous High-3 and select Bonus/REDUX?

- Want money now
 - Car, boat, or house
 - Debt repayment
 - Won't live past 60 and no spouse
- Think you can do better by investing money (TSP)

Investing the Bonus: Breakeven Rates of return

- What rate of return would you need to breakeven between CSB/Redux and High-3?
- Put bonus in investment and each year in retirement draw out exactly the difference between the CSB/Redux and High-3 pensions
 - Do this until age 79
 - At age 79 would have exhausted \$ in account
- Note that Marine must obtain the breakeven rate of return for *every year* until age 79

Breakeven Rates of Return

- Retiring at 20 years of service, age 40
 - 14.1% for E-6s
 - 15.4% for E-7s
 - 16.5% for E-8s
 - 17.7% for E-9s
 - 20.2% for CWO-3s
 - 24.0% for O-4s (retirement age 42)
- These rates aren't attainable

Thrift Savings Plan (TSP)

- Terrific vehicle for saving for older years
 - Tax-sheltered
 - Penalties if withdraw before age 59½
- But, cashing-out the ***tax-sheltered*** High-3 to put money in tax-sheltered TSP is bizarre
 - Even if you get the bonus tax free in combat zone
 - Need to earn much higher than normal returns *every* year to breakeven
 - Moreover, High-3 pension is inflation-protected and risk free

Take Rates for CSB/REDUX: March 2004

- Almost 4,000 Marines have made the irrevocable choice
- Take rates
 - 50% of enlisted
 - 40% of chief warrant officers
 - 13% of commissioned officers
